## (54) Optical coherence tomography assisted surgical apparatus

(57) Ophthalmologic surgical microscope which is combined internally with an optical coherence tomography ("OCT") apparatus wherein auto-focusing is provided by driving a motorized internal focusing lens of the ophthalmologic surgical microscope with a signal output from the OCT apparatus. An embodiment of the inventive ophthalmologic surgical microscope includes: (a) an optical coherence tomography ("OCT") apparatus; (b) a beamcombiner for internally coupling output from the OCT apparatus into the ophthalmologic surgical microscope; and (c) a motor for moving an internal focusing lens of the ophthalmologic surgical microscope in response to a signal from the OCT apparatus, whereby the ophthalmologic surgical microscope is auto-focused.

|   |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |
| The present European patent application comprised at the time of filing more than ten claims. |  |  |  |  |  |  |  |
|   | All claims lees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.  |  |  |  |  |  |  |
|   | Only part of the claims fees have been paid within the prescribed time limit. The present European search-<br>report has been drawn up for the first ten claims and for those claims for which claims fees have been paid,   |  |  |  |  |  |  |
|   | namely daims:  |  |  |  |  |  |  |
|   | No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |
| X LA  | CK OF UNITY OF INVENTION   |  |  |  |  |  |  |
|   | n Division considers that the present European patent application does not comply with the requirement of unity of<br>and relates to several inventions or groups of inventions,   |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |
|   | Claims 1-14:     Optical coherence tomograph internally coupled to ophthal- mologic surgical microscope.   |  |  |  |  |  |  |
|   | 2. Claims 15-22:   |  |  |  |  |  |  |
|   | Optical coherence tomograph combined with surgical laser apparatus.  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |
| ×   | All turther search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.   |  |  |  |  |  |  |
|   | Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respects of which search fees have been paid, |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |
|   | namely claims:   |  |  |  |  |  |  |
|   | None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims,                          |  |  |  |  |  |  |
|   | namely claims:   |  |  |  |  |  |  |

European Patent Office

EP 95109894 - B -

### LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

Optical coherence tomograph internally coupled to ophthalmologic surgical 1. Claims 1-14:

microscope.

2. Claims 15-22: Optical coherence tomograph combined

with surgical laser apparatus.
